Do you know there are even more models of KX A143EXC from Panasonic? If you are unsure what plasma is, you can read our article: [Introduction to Plasma TV](#). 2 Comments Shopping for a plasma tv is a vast subject to cover, with plenty of things to consider. Whether you're looking for a plasma tv for your bedroom or the entire family room, we are here to help you get it in the right hands. Let's start with the basics and then progress from there: What are Plasma TVs? Every tv is made of three main components: The screen that is made up of glass (or other light-sensitive material), the backlight, and the picture tube. The picture tube is the face of the tv. Plasma is a form of cathode ray tube (CRT) which has a long history of being used in televisions and other display devices. This technology is still used for plasma tv panels today, and they have been gaining popularity in the market recently. What are the Differences Between LCD, LED and Plasma? Image Credit: Amazon LCD and LED televisions both use liquid crystal panels, while plasma televisions use plasma panels. These panels are often quite similar, but each has their own pros and cons: Liquid crystal display (LCD) panels are very thin, often less than 1/2 inch, making them ideal for televisions that fit in small spaces. LCD panels are also viewable from angles, but are not as bright and colorful as plasma panels. They also 82157476af
